

B.Tech. (Cosmetic)

The Bachelor of Technology (B.Tech.) in Cosmetics is a pioneering program available in the Maherbanu College that bridges the gap between science and beauty, offering a unique blend of education in cosmetic science, engineering, and technology. This innovative course is designed to provide students with a deep understanding of the formulation, development, and production of cosmetic products.

Students in the B.Tech. Cosmetics program will explore a wide range of subjects, including chemistry, biology, and dermatology, as well as specialized courses in cosmetic formulation, safety assessment, and regulatory affairs. The curriculum is tailored to ensure a comprehensive education that combines theoretical knowledge with practical skills.

B.Tech. Cosmetics program is the emphasis on hands-on learning. Students have access to advanced lab facilities equipped with the latest technology and equipment, allowing them to engage in cutting-edge research and development projects. Under the guidance and mentorship of dynamic HOD Prof. Quddusa Farooqui, experienced faculties and industry professional's students at Maherbanu College are nurturing their skills.

Graduates of the B.Tech. Cosmetics program are well-prepared for a variety of career opportunities in the cosmetic and personal care industry, including roles in product development, quality control, regulatory compliance, and research. With a strong foundation in both science and technology, students are equipped to meet the challenges of this dynamic and rapidly growing field.

Embark on a transformative educational journey with the B.Tech. Cosmetics program and become a leader in the world of cosmetic science and technology.
